

Dear Parents,

Tuesday, November 9, 2010

We are graduate students working towards an M.B.A. at the Anderson School of Management at the University of New Mexico. As part of our Information Systems Security class we chose to present to your child's class on the importance of internet safety. These are some of the themes that we presented on:

- Don't share personal information online
- Don't arrange to meet people that you meet online
- Tell your parents or a trusted adult if you feel weird about something you see on the internet

One of the best ways to keep your child safe is to monitor what they do on the computer. We enjoyed teaching your students about computer safety and hope that you will help us to reinforce these concepts at home. If you are interested in finding more information about computer safety, the following are some websites that we found helpful:

- [http://www.ikeepsafe.org/iksc\\_kids/](http://www.ikeepsafe.org/iksc_kids/)
- <http://www.fbi.gov/stats-services/publications/parent-guide/parent-guide>
- <http://home.disney.com.au/activities/surfswellisland/>

If you have any questions about the information that we presented on today, please feel free to contact us through your child's teacher.

Thank you,

Carson and Kara
