

ONLINE SAFETY

Passwords

Passwords are your first and sometimes only line of defense. Keep yourself safe from attackers by following these tips.

Password Guidelines

- ⇒ Use different passwords for different apps/websites
- ⇒ No site or app names in the password
- ⇒ Avoid personal information in the password
- ⇒ Passphrases instead of passwords
- ⇒ Longer passwords are harder to crack
- ⇒ Use uppercase and lowercase letters, numbers and symbols
- ⇒ Change passwords frequently
- ⇒ Practice typing your password

Public Wi-Fi Tips

- ◇ Confirm network name and password
- ◇ Look for https
- ◇ Don't auto connect
- ◇ Log out when you're finished
- ◇ Explore browser add-ons such as HTTPS everywhere or Force-TLS

Remember!

- Nothing is ever fully deleted
- Nothing is truly private
- Think before you click
